Code Beyond Limits - Transforming Idea into Reality

In Association with
Institution's Innovation Council

Idea Presentation Round

Team Name: **System Daemons**

- Theme: **AI and Technology Innovations**

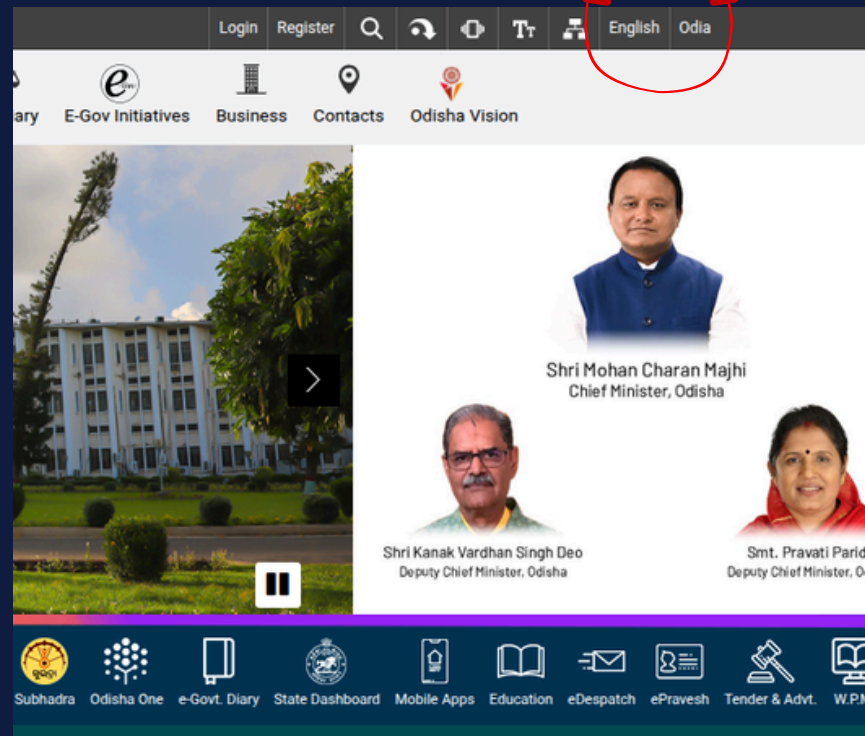

Project category:
Software

Project Title: **GovAssist AI – Autonomous Citizen Service Chatbot**

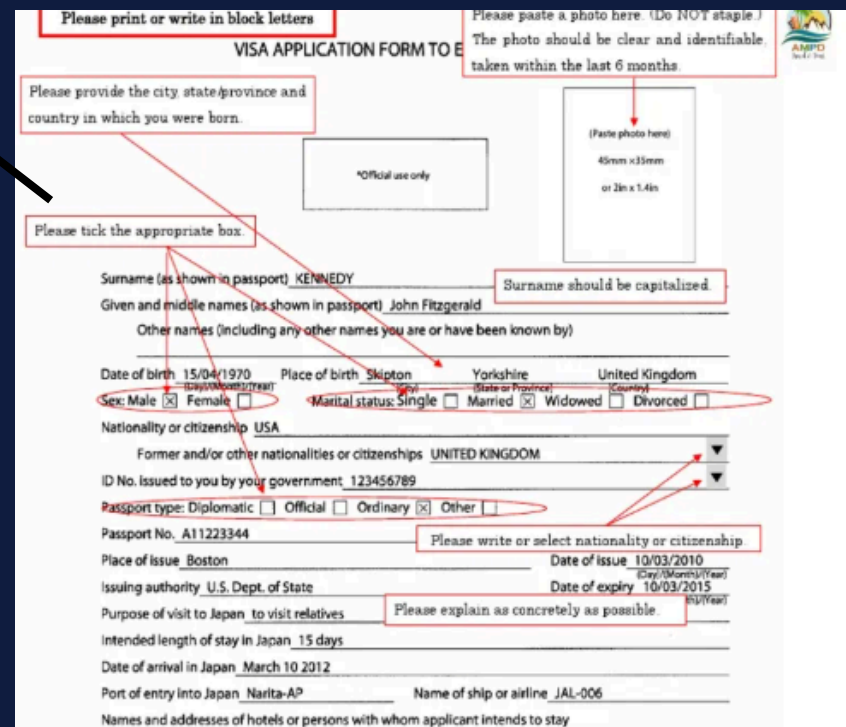

Problem Statement

Overview of Idea

Minimum
Language
Support

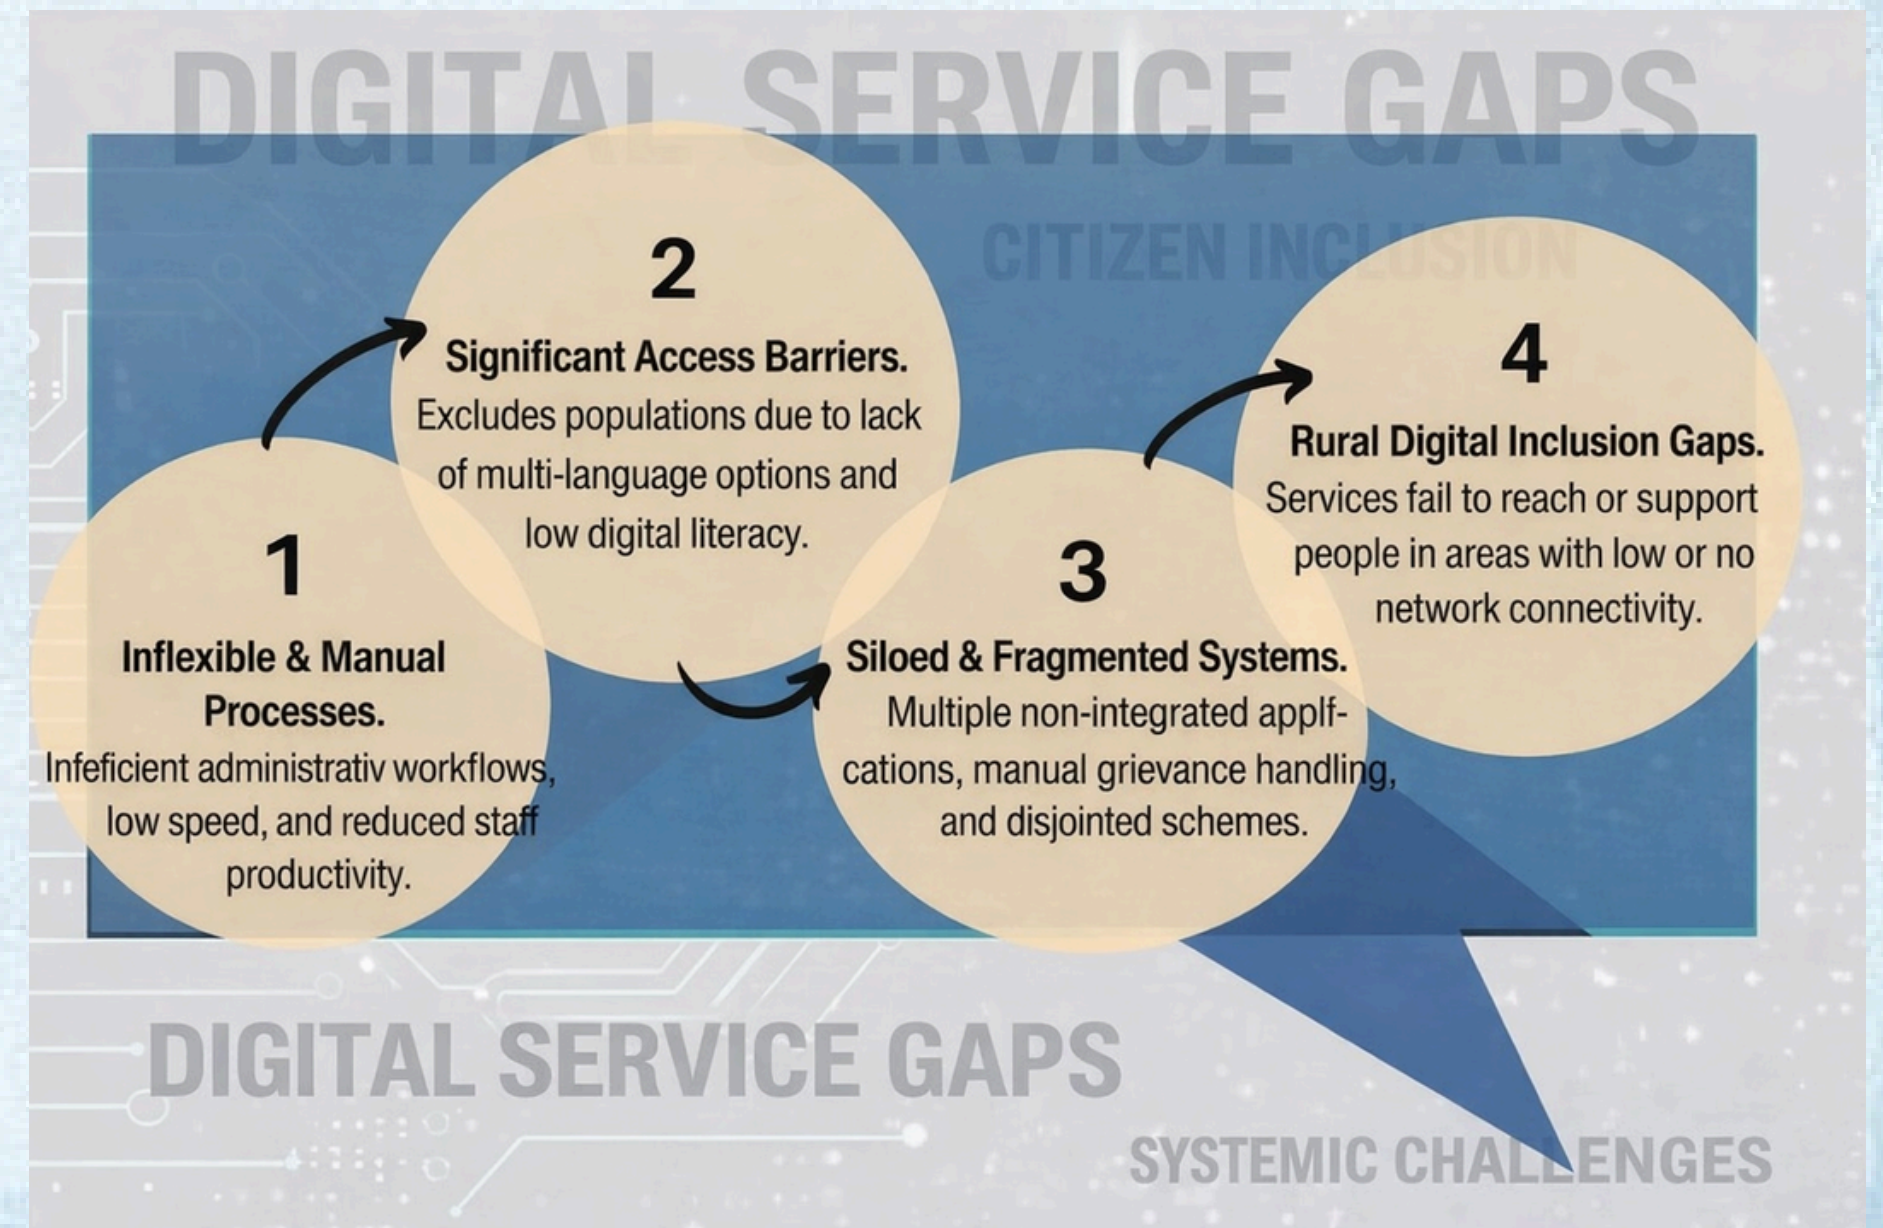

Manual
Form
Filling

Problem Statement

Average citizens spend 8+ hours yearly on paperwork. 40% of applications are abandoned due to complexity. Existing government chatbots only answer FAQs — they cannot submit, track, or complete services

Proposed Solution

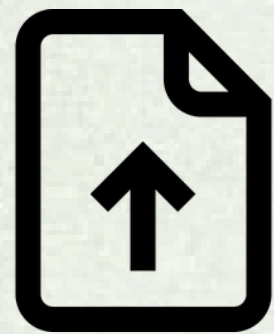

Our AI chatbot eliminates complex government procedures and enables citizens to complete services through a simple conversational interface.

Existing vs Proposed AI System

Aspect	✗ Existing System	➔ ✓ Virtual Civil Servant System
- Service Access - Language Support - Service Processing - Governance Model - Scheme Guidance	- Citizens navigate multiple complex government portals - Mostly English or limited language support - Manual application submission and tracking - Fully manual government service delivery - Citizens struggle to understand eligibility and documents	- One unified AI platform for all government schemes - Real-time voice & text support in Hindi, English and regional languages - Automated assistance for applications, tracking and FAQs - Human–AI collaborative governance with smart escalation to officers - Intelligent assistants guide eligibility, documents and scheme selection

Result: Inclusive, transparent and AI-driven digital governance for every citizen.

Proposed Solution

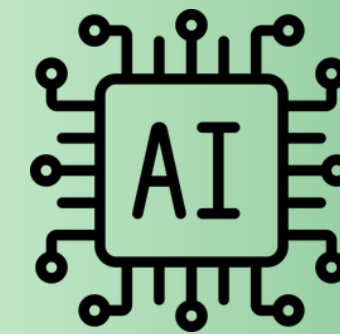

Intelligent Document Upload & Auto-Data Extraction

- Upload government documents easily
- Automatically extracts required information
- Auto-fills application forms instantly

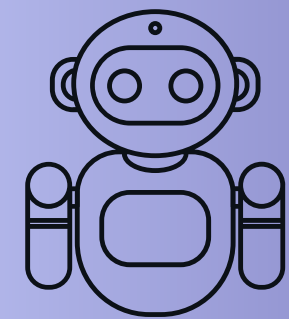

Multilingual Voice & Text Interaction

- Voice & chat interaction with the system
- Supports Hindi, English & regional languages
- Automatic language detection for users

RAG-Powered Intelligent Knowledge System

- Understands user queries and documents
- Retrieves verified government scheme data
- Provides accurate eligibility guidance

Smart Governance Assistance Engine

- Personalized scheme recommendations
- Transparent eligibility explanation
- Automated alerts & notifications

Transforms traditional government portals into an intelligent, inclusive and citizen-centric digital governance platform.

Impact and Conclusion

Impact of the solution and Conclusion

SOCIAL IMPACT

- Multilingual and voice access for rural citizens
- Bridges the digital divide for non-technical users
- Builds trust with real-time tracking and clear decisions
- Makes applying for government schemes much easier

ENVIRONMENTAL IMPACT

- Cuts down physical visits to government offices
- Lowers travel emissions from citizens
- Replaces physical paperwork with digital tracking
- Supports a greener, paperless system

ECONOMIC IMPACT

- Delivers services **50%** faster to citizens
- Saves people time and travel money
- Gives instant, verified data using RAG
- Easily handles **100K+** users at scale

OPERATIONAL IMPACT

- Reduces government officer workload by **50%**
- AI fully automates routine tasks
- Auto-escalates sensitive cases with exact documents
- Connects **20+** schemes into one smart interface

**Upto 8+ Hours
Saved**

**22+ Indian
Languages
Supported**

**100+ Schemes
Integrated**

**50% Workload
Reduction**

THANK YOU
